Text with highlighted words

Why do I have sudden "bursts" of depressionI **know** the title probably doesn't make sense but I stopped working for a while to peruse a business idea i had (which failed) and now I'm about to go back into the work force I'm only 19 and I have these moments where i just feel lost and like I failed my family and friends as my business is what i dedicated my **life** to for the **past** 6 months and most of that time was me sitting in my room **trying** to get it off the ground floor. I'm really nervous about **getting** a job again as i haven't had a real one that entire time am I just overthinking it or will it be not as bad as i think.
